

Manoj Kumar Thakur

Sunnyvale, CA - 94086 • (820) 444-0714 • manojthakur9893@gmail.com • <https://www.linkedin.com/in/manoj-thakur-801030213/>

Senior Technical Writer with 9+ years of experience creating developer-focused documentation in software development environments. Specialized in docs-as-code workflows, API documentation, SDK documentation, and developer platforms. Experienced working in Agile/Scrum environments and collaborating with software engineers, product managers, and QA teams to deliver high-quality documentation aligned with product releases. Strong technical background with hands-on experience in Python, REST APIs, JSON, YAML, and developer tooling. Skilled in designing documentation information architecture, building scalable documentation pipelines, and automating documentation validation using CI/CD workflows and AI-assisted tools.

Core Skills

Documentation:	API Documentation • SDK Documentation • Developer Guides • User Guides • Release Notes • Troubleshooting Guides • FAQs • Integration Documentation • Developer Onboarding • Technical Specifications
Docs-as-Code & Authoring:	Markdown • Git • Docs-as-Code Workflows • Static Site Generators (Docusaurus, MkDocs, Sphinx, Jekyll) • VS Code • OpenAPI • Swagger
Authoring & Workflow:	Markdown, Git, Docs-as-Code Workflows, Static Site Generators, VS Code, YAML, JSON, OpenAPI, Swagger, Postman
Programming & Technical:	Python • SQL • Java • REST APIs • JSON • YAML • Bash
Development Processes:	Agile/Scrum • Software Development Lifecycle (SDLC) • Sprint Planning • Daily Standups • Sprint Reviews • Retrospectives • Documentation in CI/CD Pipelines
Tools:	GitHub • GitLab • Jira • Confluence • Draw.io • Visio • Lucidchart • Postman • Oxygen XML Editor • Madcap Flare • 3DX Catia • Arbortext Editor
AI & Automation:	GitHub Copilot • ChatGPT • AI-assisted documentation workflows • Documentation validation automation
Operating System:	Windows • Linux (Ubuntu) • macOS

Experience

JUN 2025 – TILL DATE

Technical Writer | Zoox Headquarters | Foster City, California

- Produced comprehensive developer and technical documentation for simulation SDKs and diagnostic APIs supporting robotic and autonomous vehicle workflows.
- Authored documentation in Markdown using docs-as-code workflows and Git version control, enabling collaborative documentation development with engineering teams.

- Developed API documentation, Python reference implementations, and integration examples demonstrating real-time data streaming and sensor processing architectures.
- Created Service manuals, Troubleshooting guides, Mission Readiness documents and Manufacturing workflow process in XML editor for Technicians.
- Collaborated closely with engineers, QA teams, and product stakeholders within an Agile development environment, aligning documentation updates with sprint releases and feature delivery.
- Created developer onboarding guides, troubleshooting documentation, and FAQs to improve developer productivity and reduce support requests.
- Authored How-to and FAQ content addressing recurring developer support queries, reducing Slack ticket volume by 25%.
- Produced architecture diagrams and workflow visualizations using Visio and Draw.io to illustrate system components, integration points, and data flows.
- Maintained documentation updates aligned with software release cycles and SDLC processes, ensuring documentation accuracy during feature changes and system updates.
- Leveraged AI-assisted tools such as GitHub Copilot and ChatGPT to improve documentation clarity, accelerate content generation, and validate technical explanations.

NOV 2024 – JUN 2025

Technical Writer | Indeed | Austin, Texas (Remote)

- Authored and maintained developer documentation for Analyze, Orchestrate, Discover, Trino, and IQL APIs, combining Markdown documentation with executable Java and SQL examples.
- Collaborated with engineers and product managers in an Agile/Scrum development environment, ensuring documentation delivery aligned with sprint milestones and platform releases.
- Maintained documentation repositories using Git and GitLab, supporting branching, pull requests, and collaborative review workflows.
- Built Python-based validation scripts to test REST endpoints, OAuth authentication workflows, and microservice integration pipelines.
- Maintained GitLab CI/CD pipelines to lint Markdown, validate API schemas, and automatically test documentation code examples against live endpoints.
- Partnered with engineering teams to auto-generate API documentation from OpenAPI specifications and integrate documentation builds into deployment pipelines.
- Created architecture diagrams and data-flow visualizations using Figma and Visio to support developer understanding of system interactions.
- Developed reusable documentation templates and onboarding guides that reduced developer integration time by 40%.

JUN 2014 – JUL 2022

Technical Writer | Cades Studec Technologies India PVT LTD | Bengaluru, India

Client: Intel Corporation | Oct 2018 – Jan 2022

- Authored developer-focused documentation for semiconductor automation SDKs and integration guides, enabling engineers to implement process control and calibration workflows.
- Created API documentation, code samples, and how-to guides that demonstrated SDK functionality and usage patterns, validated against production SDK releases to ensure technical accuracy.

- Collaborated with embedded software engineers and product teams within Agile development cycles to gather requirements, interpret technical specifications, and deliver documentation aligned with software release milestones.
- Implemented docs-as-code workflows using GitLab and CI/CD pipelines to automate documentation builds, schema validation, and API change detection, improving documentation reliability and release readiness.
- Developed reference applications and sample integrations illustrating SDK usage for semiconductor equipment automation and manufacturing process control systems.

Client: *Airbus* | Jun 2014 – Oct 2018

- Authored and maintained aircraft maintenance documentation (AMM, SRM, troubleshooting procedures) in compliance with ATA iSpec 2200, FAA, EASA, and ISO standards.
- Developed structured XML-based technical documentation using Arbortext Editor, enabling modular content reuse and efficient updates across multiple aircraft programs.
- Collaborated with system engineers, focal points, and design office teams to validate procedures through design reviews and on-aircraft maintenance validations, ensuring technical accuracy and operational feasibility.
- Mentored and trained new technical authors, providing guidance on documentation standards, tools, and best practices to improve team productivity and consistency.
- Managed multiple parallel documentation projects, informally leading author teams to achieve 100% on-time delivery with 97% quality compliance.

Education

MAY 2024

Master of Information Technology | California Lutheran University | Thousand Oaks, California | 3.69 GPA

MAY 2014

Bachelor of Aviation Technology | Singhania University | Rajasthan, India | 3.5 GPA

AWARDS & ACHIEVEMENTS

- Promoted to Technical Data Engineer/Proofreading within two years for quality and performance.
- Three consecutive quality/on-time delivery awards.
- Introduced peer-review process, improving accuracy and reducing documentation errors by 15%.
- Re-architected the Data Platforms information hierarchy: standardized taxonomy, navigation IA, and versioning; improved findability and reduced duplication, lowering external support asks by 25%.

Certifications

XML Essential Training (LinkedIn Learning) • Career Essentials in Data Analysis (Microsoft/LinkedIn) • Power BI Data Methods (PMI/LinkedIn) • Tableau Essential Training (NASBA/LinkedIn)

Activities

Gardening • Cooking • Hiking • Love Watching Anime • Travel
