<https://www.linkedin.com/in/manoj-thakur-801030213/>

Senior Technical Writer with 10+ years of experience specializing in API/developer platform documentation and regulated technical content. Proven record producing API reference guides, integration tutorials, service manuals, SOPs, and troubleshooting guides across IT, networking, autonomous vehicles, medical devices, semiconductors, automotive, and aerospace industries. Skilled in structured authoring (DITA, Oxygen XML), developer tooling (GitLab/GitHub, CI/CD, Markdown, CLI), and content optimization for developer portals to improve discoverability and onboarding. Hands-on with OpenAPI/Swagger, REST, JSON/YAML, and documenting authentication/authorization flows (OAuth 2.0, API keys, JWT). Adept at collaborating with engineers, product managers, and UX/UI teams to deliver accurate, user-focused, and audit-ready content aligned with compliance standards (FDA 21 CFR Part 11, ISO 13485, S1000D, ATA iSpec 2200).

Core Skills

Docs & Domains:	Developer docs, API/SDK guides, developer portals, service manuals, SOPs, troubleshooting, release notes, first-responder guides, repair guides, IFU.
Authoring & CCMS:	Oxygen XML, DITA, MadCap Flare, FrameMaker, Arbortext, Markdown
Dev & APIs:	OpenAPI/Swagger, Postman, REST, JSON/YAML, CLI docs, API authentication & authorization (OAuth2.0, API keys, JWT)
Versioning & CI/CD:	GitLab, GitHub, PR/MR workflows, automated linting/validation, CI previews
CMS & Collaboration:	Confluence, SDL Tridion Docs, PTC Windchill, Veeva Vault, SharePoint, Jira
Graphics & CAD:	Adobe Illustrator, Photoshop, Microsoft Visio, CATIA, CAD tools
Standards & Compliance:	FDA 21 CFR Part 11, ISO 13485, IEC 62304, S1000D, ATA iSpec 2200, ASD-STE100, ISO 9001, Automotive SPICE, DX best practices
Platforms & Tools:	VS Code, Microsoft 365, Power BI
Operating System:	Windows, Ubuntu, iOS

Experience

APR 2025 – PRESENT

Technical Writer | Indeed | Austin, Texas

- Own and publish external, developer-facing docs for Analyze, Orchestrate, Discover, Trino, and IQL on the Partner/Developer Docs portal, optimizing structure for discoverability and usability.
- Author API reference and how-to content in Markdown; document REST endpoints/OpenAPI, data models (JSON/YAML), errors, and end-to-end workflows including authentication/authorization flows (OAuth2.0, API keys, JWT).

- Document infrastructure services supporting hybrid Linux environments, including API integrations, data pipeline orchestration, and service monitoring workflows.
- Develop internal runbooks and reference docs for infrastructure modernization and cloud lift-and-shift strategies, detailing migration workflows, service dependencies, and CI/CD automation steps.
- Work in GitLab MR workflows using VS Code and CLI; integrate docs into CI/CD with automated previews, link checks, and linting to keep reviews fast and reliable.
- Partner with Engineering/PM/UX to turn specs, demos, and sprint outcomes into accurate docs; collaborate with UX/UI teams to refine developer portal experience and cover requirements, architecture overviews, and release notes.
- Maintain a structured, searchable internal wiki/knowledge base; align content to style guides, taxonomy, and developer experience (DX) best practices.
- Create architecture diagrams, workflow illustrations, and UI walkthroughs (Visio/Illustrator) to accelerate onboarding and reduce support questions.
- Document data pipelines/ETL, internal SDKs/CLIs, and operational runbooks, improving developer adoption and troubleshooting speed.
- Contribute to technical specs/RFCs and decision logs; plan and track doc work through standups, sprint planning, and retrospectives; proactively close content gaps.

DEC 2024 – APR 2025

Technical Writer | Zoox Headquarters | Foster City, California

- Authored service/repair/troubleshooting manuals and SOPs for autonomous robotaxi systems, documenting networked system diagnostics, onboard APIs, and connectivity protocols.
- Produced diagnostic flowcharts and process maps; standardized PM schedules and checklists for faster troubleshooting.
- Drove version control and review cycles in GitHub and Confluence; applied org style guides and developer experience principles for consistency.
- Created infrastructure service documentation covering data center network topology, storage utilization, and cloud synchronization for fleet analytics.
- Developed first-responder and emergency shutdown protocols; developed rework/retrofit bulletins.
- Delivered illustrations and UI walkthroughs; validated procedures with engineers/technicians, ensuring clear integration steps across software and hardware systems.

JUN 2013 – JUL 2022

Senior Technical Writer (Client engagements) | Cades Studec Technologies | Bengaluru, India

Client: Siemens Healthineers | May 2019 – Jul 2022

- Produced IFUs, service manuals, SOPs, troubleshooting guides, FAQs aligned to FDA/ISO 13485.
- Authored content on system infrastructure migration, cloud connectivity, and backup storage workflows for diagnostic platforms.
- Created structured content in Oxygen XML/DITA; implemented reuse for multichannel publishing.
- Managed controlled content in Veeva Vault; coordinated peer reviews with healthcare professionals.
- Led localization via XLIFF and SDL Trados for multilingual releases.
- Built preventive maintenance, calibration, and system-health procedures; ran content audits for accuracy.
- Documented device APIs, data flows, and authentication steps for integrating diagnostic equipment with hospital IT systems.

Client: *Intel Corporation* | **Oct 2017 – May 2019**

- Created service/maintenance/installation guides for semiconductor automation equipment.
- Authored in FrameMaker; produced schematics/diagrams in Visio/InDesign/CAD.
- Drove workflow control with PTC Windchill; collaborated with SMEs for process control and yield analysis.
- Wrote PM/calibration/troubleshooting instructions; enforced ESD and LOTO safety guidance.
- Documented embedded APIs, hardware-software interfaces, and networking protocols used in automation systems.
- Supported translations and trained junior writers on industry standards.

Client: *Kia Motors* | **Apr 2016 – Oct 2017**

- Developed service manuals, repair guides, and diagnostics content using FrameMaker and MadCap Flare.
- Automated content updates with Python scripting; managed repositories in Windchill/SharePoint.
- Produced wiring diagrams and interactive illustrations (Illustrator/Isodraw/Visio); applied STE principles.
- Ensured ISO/TS 16949 compliance; synchronized with training and service teams.
- Authored diagnostics API usage notes and communication steps for connected-vehicle systems.

Client: *Airbus* | **Jun 2013 – Oct 2017**

- Authored AMM, IPC, SRP, and TSM content to ATA iSpec 2200, S1000D, ASD-STE100, FAA/EASA standards.
- Built XML content in ATMS/Arbortext; handled revision/configuration management (GIDOCA, DACAS, SAP).
- Integrated SB/MPD/COC/TN updates; resolved airline RFIs via TechRequest; tracked KPIs and milestones.
- Mentored junior writers on aerospace tooling and best practices.
- Contributed to documentation of avionics APIs, system integration steps, and secure access protocols.

Education

MAY 2024

Master of Information Technology | California Lutheran University | Thousand Oaks, California

3.69 GPA • Member of university's Alumni Society

MAY 2013

Bachelor of Aviation Technology | Singhania University | Rajasthan, India

3.5 GPA

Certifications

XML Essential Training (LinkedIn Learning) • Career Essentials in Data Analysis (Microsoft/LinkedIn) • Power BI Data Methods (PMI/LinkedIn) • Tableau Essential Training (NASBA/LinkedIn)

AWARDS & ACHIEVEMENTS

- Promoted to Technical Data Engineer/Proofreading within two years for quality and performance.
- Three consecutive quality/on-time delivery awards.

- Introduced peer-review process, improving accuracy and reducing documentation errors by 15%.
- Re-architected the Data Platforms information hierarchy: standardized taxonomy, navigation IA, and versioning; improved findability and reduced duplication, lowering external support asks by 25%.
